Il Manca dell'Arca cita una &laquo;Uva de Angheles &ndash; dotata di &ndash; racemo grande, e grani grossi, rotondi &ndash; considerato il nome e le caratteristiche potrebbe trattarsi dell'Argu Mannu. Descritta anche dal Moris (variet&agrave; &laquo;robust&agrave;, o in sardo &laquo;Arbumanna&rdquo;), &laquo;Angius la registra in Ogliastra. Il Cettoini, pur pendendosi tra le varianti (e i relativi significati) del sardo lo individua a Carloforte, a Nuoro e ad Ozieri. AGRIS, di recente, lo ha individuato nei vecchi vigneti del sud dell'Isola, della Marmilla e del Barigada. Non sono state trovate corrispondenze genetiche a questo vitigno nelle banche dati del DNA attualmente disponibili e pertanto si pu&ograve; considerare anche questo un unicum. &laquo;Argu Mannu presenta un profilo unico e geneticamente piuttosto isolato. Qualche affinit&agrave; &agrave; riscontrabile con il Galoppo. </span></p>
